

Olympia Pharmacy
Methylcobalamin
Injection 10ml MDV

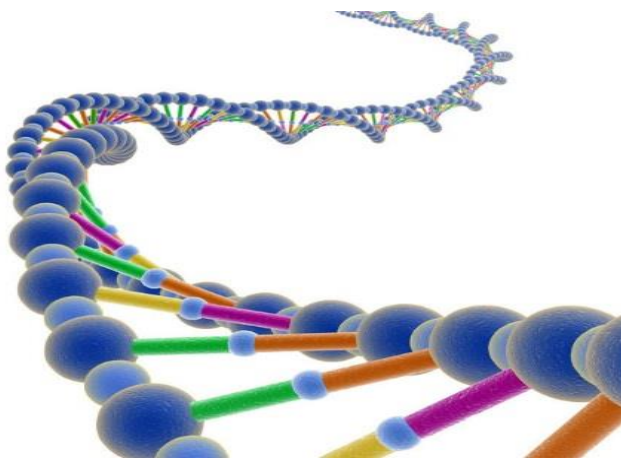

Active Ingredients:

Methylcobalamin (B12): Is necessary for healthy nerve cells, DNA/ RNA, red blood cell production and energy. Methylcobalamin is one of two coenzymes forms of B12, the other is Cyanocobalamin. Methylcobalamin is the more bio available of the two, meaning it is ready for utilization by the body as soon as it is injected.

Other benefits include:

- Supports immune system regulation
- Converts carbohydrates into glucose
- Essential for healthy hair, skin and nails.
