

Olympia Pharmacy RELAX

Injection 10ml MDV

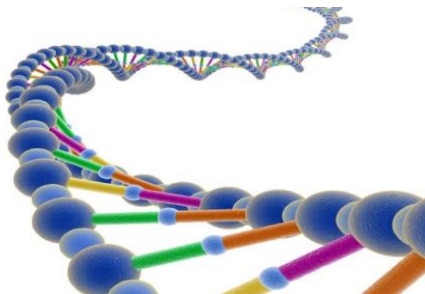

Active Ingredients:

Magnesium: Promotes vasodilation which can help lower blood pressure and treat migraine headaches.

GABA: An amino acid that is beneficial is calming nervous activity. Several studies have linked elevates levels of GABA to an increase in secretion of HGH (Human Growth Hormone)

Taurine: Has been linked to improved mental function, reduced anxiety and promoting a detoxifying effect in the body. There are also studies that have shown Taurine is effective in treating diabetes by increasing glucose metabolism.

Theanine: Also found in green tea, is a natural remedy for reducing physical and mental stress and anxiety. Studies have shown theanine makes one feel relaxed without causing sleepiness.

Description

Recommended Dosage:
0.5ML twice weekly for 1 week
1ML twice weekly thereafter
Intramuscular

Olympia's RELAX is formulated to help people with anxiety, muscle tension or migraine headaches. As a secondary benefit, **RELAX** also aids the body in secreting growth hormone.

The **RELAX** formulation promotes relaxation, mental awareness, detoxification and may also promote vasodilation (magnesium) resulting in lower blood pressure.
